

Ball joint

The ball joint is used for holding a dresspack in the system holder. This allows the dresspack adequate freedom of movement, because it can move approx. 22° in all directions when in the installed system holder.
The globe variant additionally absorbs torsion from the corrugated hose.

Type	Order no.	Material	Colour	PU pce.	Remarks
NW36					
Ball joint jaws NW36	902007	PA	Black	1	matching clamping clip NW 52M
Protector NW36	902232	PA	Black	1
